

Spring checklist

Wind Song

- ☐ Clean deck and remove pinecones and needles from between planks
- ☐ Remove dirt and debris from between deck wood and ground on North and West sides of deck to keep supports dry and prevent rot. Use leaf blower.
- ☐ Clean exterior windows

General

- ☐ Mow grass on edge of driveway - as needed about 3X/year
- ☐ Mow the septic field to maintain grass and keep free of bushes/shrubs. Stop mowing on the 4th of July to ensure there is sufficient grass cover to insulate the septic system in winter.
- ☐ Clean septic filter (located in the pipe on the lake side of the green cover).
- ☐ Clean paths between garage parking area, Cedar Cove and Wind Song by using a rake with soft tongs from the top to clear the path of debris, pine cones and deer poop. Use clippers to keep path clear and prevent ingrowth.
- ☐ Maintain driveway drainage flow so it is diverted from going down the driveway and causing erosion:
 - ☐ In the area by the PVC pipes, use a shovel to mold driveway so that water runs into the pipes. Goal is to stop water from running straight down driveway
 - ☐ In the area where path meets the driveway (up by garage), use shovel to mold driveway so that water would run down driveway towards Cedar Cove instead of down the driveway toward Wind Song
- ☐ Clean and set up gnomes as needed - Spring
- ☐ Spread crushed salt on rock path behind Wind Song to kill weeds - as needed
- ☐ Knock down bluebell stems between Wind Song and garden using a rake - each spring.
- ☐ Schedule carpenter ant treatment

Cedar Cove

- ☐ Clean exterior windows

Garage

- ☐ Use leaf/snow blower around outside of the garage to remove any leaves or debris touching the foundation and wood siding to prevent rot
- ☐ Clean garage floor with leaf/snow blower
